## PROFESSIONAL EXPERIENCE

**Frontend Engineer - Polygon Technology (Previously Matic Network):** Bangalore, India

*Aug 2020 - Dec 2022*

- **Wallet Web Suite**
  - Spearheaded the development and deployment of Polygon's Wallet Suite application, a comprehensive suite of applications including the Crypto assets page, Wallet Web, Token Swap, Swap for Gas, and Widget Dashboard.
  - Assumed full ownership of the application, leading the creation of Wallet Web v2. Introduced a revamped Crypto Bridge interface and ERC20 token assets portfolio page, resulting in a remarkable increase of 120% in user traffic and a 40% boost in user engagement.
  - Handled the design and development of the cutting-edge "Crypto Token Whitelist" feature for the Bridge application. Implemented across all applications in the Wallet Suite, this feature effectively prevented fraudulent and scam tokens from exploiting the web app.
  - Created the "Bridge Widget" deployed as a package on NPM (maticnetwork/wallet-widget) that can be downloaded and integrated into any web application effortlessly, garnering over 5K downloads and attracting a dedicated user base.
  - Developed "Token Swap" and "Swap for Gas" applications in the Wallet Suite, enabling effortless token exchange within the platform. Achieved a remarkable 78% decrease in user traffic exiting the application for token exchanges, enhancing user engagement and platform retention.
  - Collaborated closely with the Design Team to conceptualize and engineer scalable UI components. Contributed to the establishment of the Matic Design System, ensuring consistent theming and promoting the reuse of UI components across all applications.
- **NFT Marketplace**
  - Led a comprehensive UI/UX overhaul of NFT Marketplace, delivering a seamless trading experience for ERC721 tokens (digital assets). Integrated innovative features, that resulted in garnering significant attention and acquisition by industry leader OpenSea.
  - Implemented support for ERC1155 tokens in the NFT Marketplace, expanding trading opportunities for diverse digital collectibles.

**Frontend Developer - Francium Tech:** Chennai, India

*Sept 2018 - April 2020*

- **MoneySmart**
  - Led the development and implementation of MoneySmart Credit Card and Personal Loan application service, for their supported banks like Standard Chartered, OCBC, and DBS in Singapore, resulting in a significant increase of over 10,000 signups in a quarter.
  - A vital contribution to revamping 4 domains of MoneySmart Blogs using Nuxt.js which resulted in significant growth in their clients and revenue.

## EDUCATION

B.Tech, Computer Science & Engineering

*May 2018*

Hindustan Institute of Technology and Science (Hindustan University), Chennai

## TECHNICAL SKILLS

**Programming languages**

- JavaScript, HTML5, CSS

**Frameworks**

- VueJS, NuxtJS, Vuex, ReactJS, Bootstrap, Tailwind, Sass, Less

**Database**

- Firebase

**Testing**

- Jest, Cypress

**Tools**

- Figma, Git, VS Code, Photoshop, Vectornator
